COMPANY

Mould-Tip was founded in 1999 and employs 1000 plus dedicated, team-oriented people. We are industry leading designers and manufacturers of hot runner systems and high precision injection molds for Thin wall packaging, Closures and Medical devices and deliver over 400 mold projects to customers all over the world every year.

•ENGINEERING

Mould-Tip's designers have a depth of experience in achieving efficient mold function and the fastest cycle time. We assist our customers with high tech product development and mold flow analysis.

•MANUFACTURING

Utilizing our state of the art, high performance machining facilities with 150 plus skilled technicians we can offer tremendous manufacturing resources to our customers resulting in shorter lead time. All mold components are planned and monitored by our own MES system to constantly ensure quality.

•QUALITY CONTROL

From the selection of only the highest quality tool steels to sustained development of our quality management system and equipment we can guarantee a level high precision and repeatability. We work closely with our customers on every technical detail to achieve satisfaction and expectations.

•MOLD TEST AND SAMPLING

Our Test Room is equipped with 10 injection molding machines ranging from 180- 500 tons. We have 3 adjustable IML robots and we can test complete system integration. We also offer FAT and Mold Validation testing in our modern, high-tech facility.

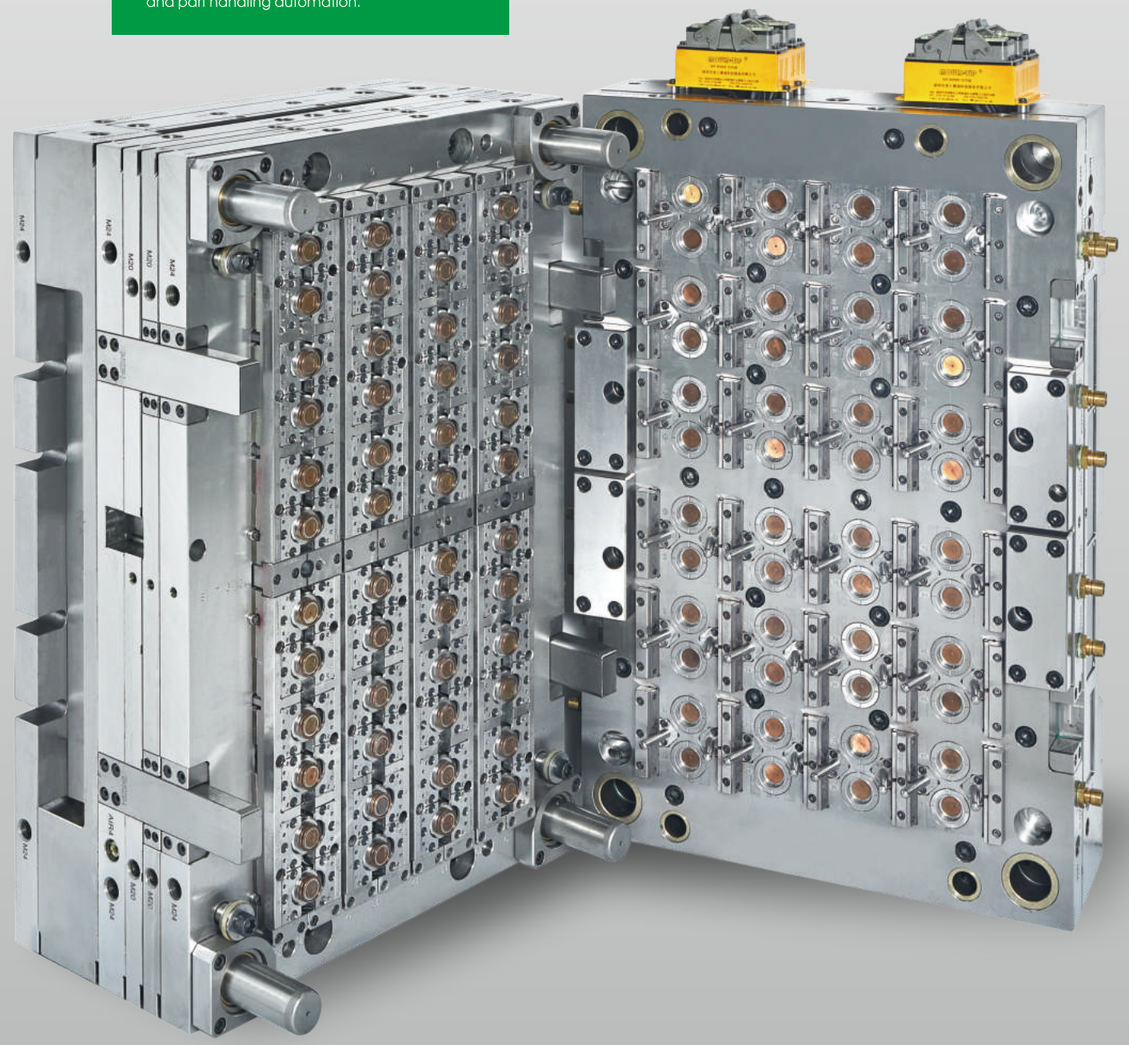
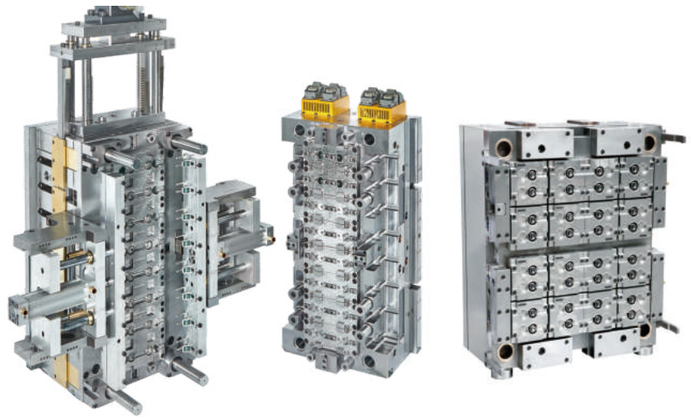
CAPS and CLOSURES

Our experience in Caps and Closure molds give us a specialized edge in the design and manufacturing process. We design single face unscrewing molds and can produce stack molds up to 72+72 cavitation. Customers can benefit from our part design expertise and take advantage of our Prototyping services as well as integrated devices such as In Mold Closing and part handling automation.

Mold technologies

- Unscrewing
- In mold closing
- Multi-Material injection
- Stack mold





Product Applications

- Beverage caps
- Personal care
- Spray caps
- Lotion pumps

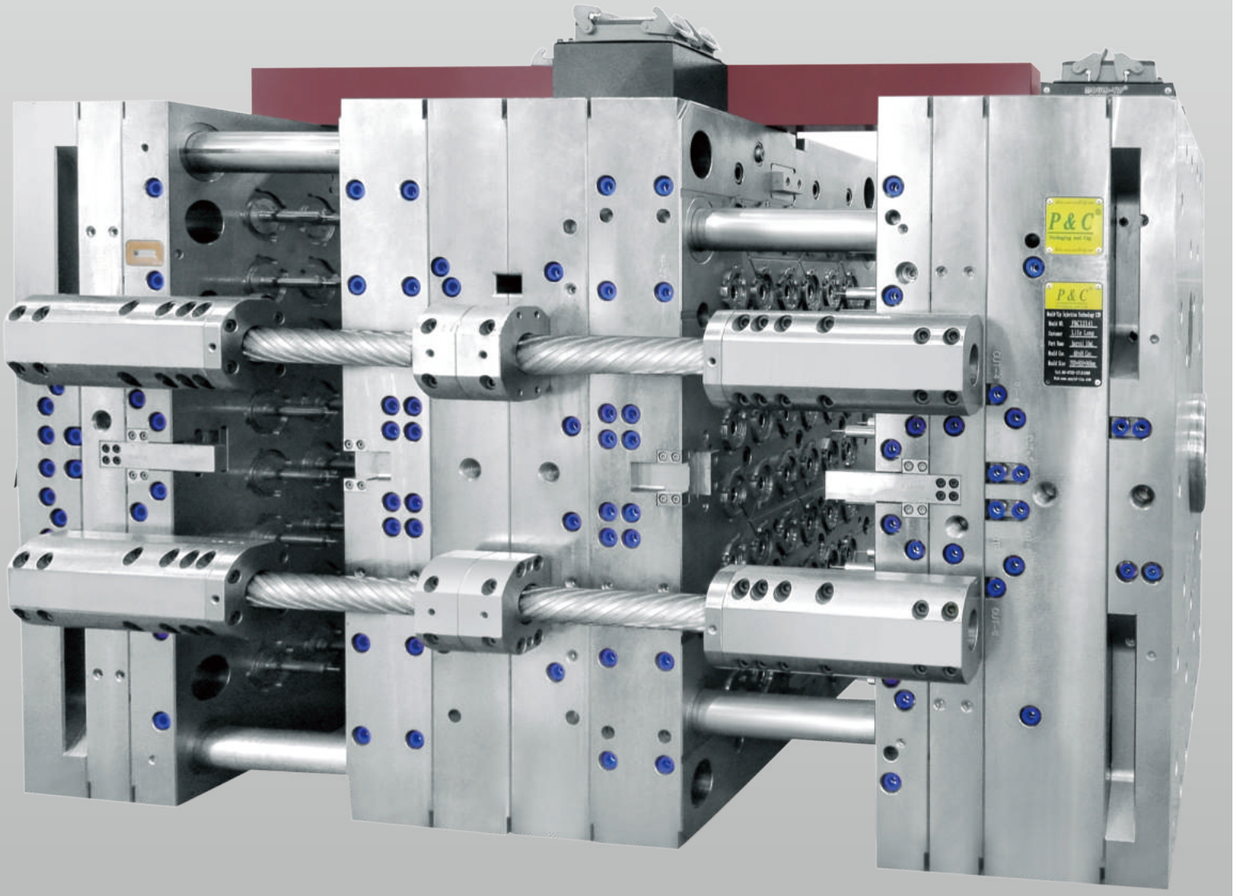
MEDICAL PARTS & DEVICES

We offer custom designed multi-cavity molds for a variety medical parts. Mould-Tip has gained rich experience in working with customers on the different precision requirements for each project. We are always innovating for and with our customers with a focus on achieving the strict requirements of the medical industry.

Mold technologies

- High Cavitation
- Conformal cooling
- Stack Molds
- System Integration (assembly & automation)



Product Applications

- Infusion Set
- Syringe
- Pipette
- Petri Dish
- Test Tube
- Bite Blocks

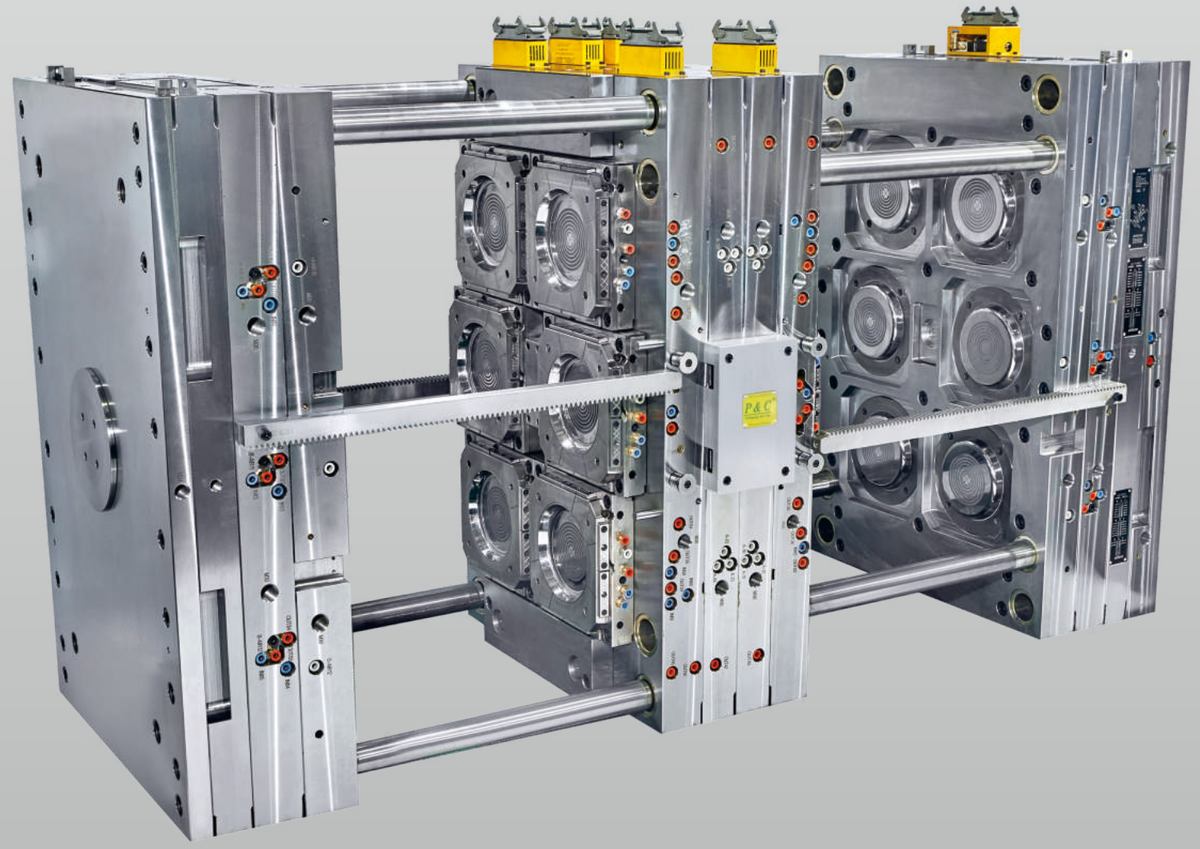
HIGH SPEED THIN WALL PACKAGING

A key factor that sets us apart from the competition is our experience with thin wall, high speed packaging molds. Mould-Tip has manufactured molds from 2 cavity to 16+16 Stack molds and our designs perform well with a focus on fast cycle time and a long mold life. We also provide integration with IML and robotic take off systems. Our vast experience with thin wall is shared with our customers in the form of part development, mold flow analysis and prototyping.

Mold technologies

- In Mold Labelling
- Stack Molds
- Quick Mold Change
- 3 & 4 Level Molds
- System integration



Product Application

- Food & Beverage Packaging
- Chemical Packaging
- Industrial Packaging
