about dea design

DEA DESIGN has been producing solid surface bathtubs and sinks since 2007, mainly exporting to European and North American markets. We have built a high reputation for our consistent outstanding quality and good service with CE and ICC-ES certificates.

“The bathroom as a dynamic and stylish living space that constantly transforms with your home”

solid surface product overview

PRODUCT DESCRIPTION

Basic use

Solid Surface is an advanced composite product used as an architectural and design material in a variety of residential and commercial applications. Solid Surface offers design versatility, functionality and durability. It is the original Solid Surface material made only by DuPont. It is widely accepted as a material for countertops, bathtub, shower tray, kitchen sinks, vanity basins and other in numerous markets including lodging, healthcare, banks, boutiques, restaurants.

Composition

Solid Surface is a solid, nonporous, homogeneous surfacing material, composed of 1/3 acrylic resin (also known as polymethyl methacrylate or PMMA), and 2/3 natural minerals. These minerals are composed of aluminum trihydrate (ATH) derived from bauxite, an ore from which aluminum is extracted. Solid Surface sinks and lavatories utilize a acrylic-modified polyester resin. For more information on the composition of the material, please consult the Solid Surface Safety Data Sheets (SDS) available via the dupont.com website or via your local supplier.

Colors of Solid Surface

A broad palette of colors allows for an almost unlimited working palette. You can choose a single color; a classic basis for design; or experiment with eye-catching harmonics. Solid Surface can also be used as inlays, accents, or as a versatile complement to other materials like metal, wood, stone, etc.

For complete information on colors, refer to samples. Hues are related by style and character. Dark, heavily pigmented colors will show scratches, dust and ordinary wear and tear more readily than lighter, textured colors. As a result, these colors are recommended for applications where surface contact is light or for use as inlays and accent colors. However, the series with deep colors incorporates an innovative, proprietary technology that delivers greater depth of color and increased durability compared to other dark colors.

Sealants and Adhesives

Solid Surface is compatible with many commercially available caulks and sealants. 100% silicone products are recommended. For making seams in countertops, repairs and custom edges, color coordinated Corian® Joint Adhesive should be used. When used in accordance with manufacturer's instructions, it provides a smooth and inconspicuous joint. Corian® Joint Adhesive is available from Corian® Design or its distributors.

MAINTENANCE

Preventing Damage to Solid Surface

Avoid prolonged exposure to strong chemicals such as acids, bases, and organic solvents. Spills should be cleaned up promptly. Refer to Corian Chemical Resistance (K-27406) for additional details regarding chemical exposures, and Corian Solid Surface Care and Maintenance for Facility Managers (K-29810) for clean up, and general maintenance. In case of exposure outside the specifications listed in the Class I Reagents section, the 10-year limited product warranty will be void and handled as a case of abuse. While unaffected by minor impacts, Solid Surface can be damaged by heavy impacts, especially from pointed objects. It can also be damaged by excessive heat.

Repairing Solid Surface

Solid Surface provides superior value by being inconspicuously repairable in most cases. Minor cuts, scratches, and stains can be removed by owners using fine sandpaper and Scotch-Brite pads. Deeper cuts or impact damage such as cracks may require an authorized fabricator/installer to make inconspicuous repairs.

glasstech product overview

PRODUCT DESCRIPTION

The material has passed anti-corrosion tests (salt spray), demonstrated chemical and physical resistance to products such as: perfumes, toothpastes, mouthwashes, coffee.

Glasstech does not turn yellow and is suitable for indoor and outdoor use.

Is not subject to chromatic changes, even under the influence of natural and artificial light.

Due to its composition, Glasstech items weigh 30% less than Solid Surface products.

A composite, durable as stone and transparent as crystal, which is hand-poured into molds. Each product is unique, slight differences in color, size or small air bubbles that may form, animate and give authenticity to each product. Grinding and polishing of products is done by hand. Colored resin, transparent with a glossy finish, consisting of high-quality acrylic resins and coloring pigments.

CARE

Minor stains can be removed with a damp cloth using liquid household cleaning detergents.

If minor scratches have affected only the upper transparent protective layer, the following steps are applicable to their removal:

1. using fine-grained sandpaper (grain size 1500-3000).
2. processing with a polishing disc using abrasive paste

TOXICITY

The product is not toxic to humans, animals and the environment.

ECOLOGY

Dispose of only in accordance with the regulations in force in the territory of your country.

colors

We offer a variety of color options.
There are 18 colors available for Solid Surface products and 9 colors available for Glasstech products.

WM - White matt
CM - Colore matt
GT - Glasstech

IT - Come da nostro campionario colori
