FLOOR PADS FOR SCRUBBERS (ROTARY CLEANING MACHINES)

CONSISTENTLY EXCELLENT RESULTS THROUGHOUT THE ENTIRE PRODUCT LIFE...

...ON ANY SURFACE!

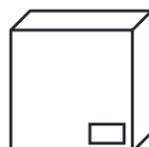

TPAD

POLYESTER-BASED PADS FOR SCRUBBERS (ROTARY CLEANING MACHINES)

SIZE:  
6"-24"  
152,4 - 610 MM

PACK SIZE:  
5 PCS

PACKAGING TYPE:  
CARTON BOX

For **polishing to high gloss**, application of mastics, oils and other impregnations, polishing soft waxes on hard floors. **Ideal for upgrading the final finish** after scrubbing or spray buffing. Perfect for parquet, natural stone, ceramic tiles, marble.

Buffing, **either dry buffing or wet spray buffing**. Removes dirt, scuffs and **black heel marks** and enhances floor appearance. Restores damage caused by normal wear and tear. Flexible, conforms to uneven floors.

For **deep cleaning, moderate scrubbing or heavy spray cleaning**. Can be used at the first stage prior to burnishing and polishing. **! More aggressive cleaning in comparison to the red pad.**

**Scrubbing**, heavy-duty wet scrubbing. Removes surface coat, dirt and scuff marks. Ideal for renovating worn or damaged floors. Conforms to the old, damaged floors and uncoated floors.

For **dry stripping, heavy scrubbing**. Quickly removes dirt and build up, easily strips wax, old finish and protective coatings from hard floors. Suitable for surface preparation prior to applying new coatings. **! Slightly less aggressive than black pad.**

For **aggressive heavy-duty wet stripping**. The black pad is able to remove virtually any dirt, old polymer-based coatings, wax and sealant. Prepares floors for recoating. Suitable for concrete and industrial floors.

# ABRASIVE SCRUB PADS

HAND PADS FOR USE WITH AND WITHOUT HOLDER

TERS

## DURABLE, EVEN WEAR PADS

- The uniform and well-bonded nonwoven web ensures excellent performance throughout the pad's useful life.

## EFFICIENT SURFACE TREATMENT

- Uniform distribution of abrasive particles not only on both surfaces, but also throughout the entire inner structure of the pad provides high performance even after erasing the top layer of the pad.

## GLOBAL QUALITY STANDARDS

- Elaborated abrasive compositions & binders, advanced technologies and modern production equipment ensure high quality meeting global industry standards.
