

LED high-efficiency and full-spectrum series light source

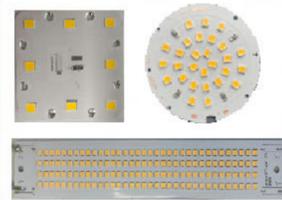

Flexible light strip

- flexible installation
- colorful light effect
- waterproof design

LED high light efficiency cob module

- high luminous efficiency
- high brightness
- low energy consumption
- long life
- high power

LED high light efficiency SMD module

- high luminous efficiency
- uniform light emission
- efficient heat dissipation
- customizable

LED green health module

- full spectrum
- suitable for the medical beauty industry and student lighting
- reducing harmful blue light

Professional light source customization service

LED MCOB series

Innovative lighting solutions

Product name

ML series

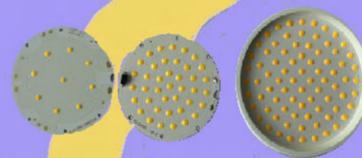

Specifications: 61/95/125/130/136,
142/145/220

Product name

DD series

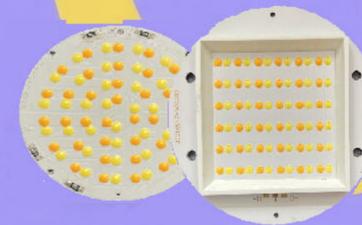

Specifications: 38/43/48/57/69

Product name

Double-color series

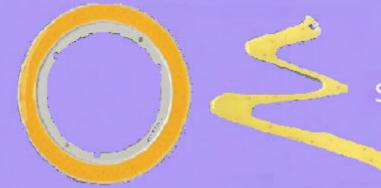

Specifications: 49.5/52/72

Advantages:

high luminous efficiency, uniform light emission, can work underwater, long life, light emission angle close to 180 degrees.

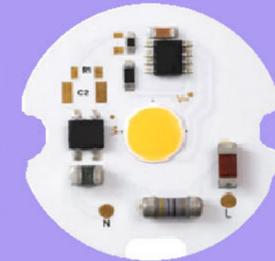

LED light source display

Strange-shaped cob module

Specifications: 70-90 can be customized

- high brightness
- low energy consumption
- long life

DOB/AC module

Specifications: 11/14/17/23

- No power supply required
- dimable

Flexible light strip

- flexible installation
- colorful light effect
- waterproof design

Illuminating future technology

LED light source technology demonstration

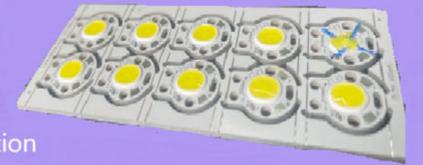

LED surface-emitting cob module

- high brightness
- low energy consumption
- long life
- uniform light emission

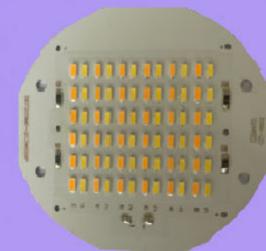

Strange-shaped cob module

- high brightness
- low energy consumption
- long life

LED double-color SMD module

- uniform light emission
- efficient heat dissipation
- customizable

DOB/DC module

- No power supply required
- dimable

Professional LED lighting solutions

expert in all-around lighting

From engineering to medical fields, all-round lighting experts.

LED street lamps for engineering use: High brightness, long life, epoxy sealing, dustproof and waterproof, multiple appearance options, reliable quality.

Full-spectrum desk lamp: The light source spectrum is close to the solar spectrum, the color rendering index is close to 100. the appearance is classic, there is no flicker, and it can meet the requirements of long-term eye use.

Trade Building, Huanchang South Road, Changping Town, Dongguan City, Guangdong Province, China

Professional LED lighting solutions

From engineering to medical fields, all-round lighting experts

LED lighting for engineering:
Patent design, surface-emitting light source, dustproof and waterproof, high luminous flux, easy to carry, suitable for various occasions

Plant growth lamp:
The shape and wavelength can be customized to help growth. Various styles of plant growth lamps are available for selection.

Camping light:
Multiple sizes are available, with magnetic attraction, USB interface, safe and convenient

Beauty teeth lamp:
Medical beauty uses light source, special wavelength helps teeth healthy whitening

From engineering to medical fields, all-round lighting experts

From engineering to medical fields, all-round lighting experts

ISO9001 certification quality assurance
Customized services to meet special needs

LED pen light:
special spectrum, durable, portable

LED cabinet light:
No flicker, high efficiency, customizable

LED panel light:
multiple colors available, high color rendering index, with switch

LED night light:
rechargeable battery, convenient, bright, beautiful

Professional LED lighting solutions

From engineering to medical fields, all-round lighting experts

Engineering LED street lamp:
high brightness, long life

LED industrial lamp:
long life, high luminous efficiency, no radiation, low energy consumption

LED tunnel lights, gas station lights:
Long life, high luminous efficiency, high color rendering index, strong heat dissipation, no flicker, no radiation, low energy consumption, low light decay, strong waterproof

Suitable for tunnels, gas stations, stadiums, fitness centers, etc.
