

**Russian manufacturer of drilling rigs
for the global mining industry**

**MADE IN
RUSSIA**

ABOUT US

13

Branches

Every year we expand our presence in Russian regions and abroad

150+

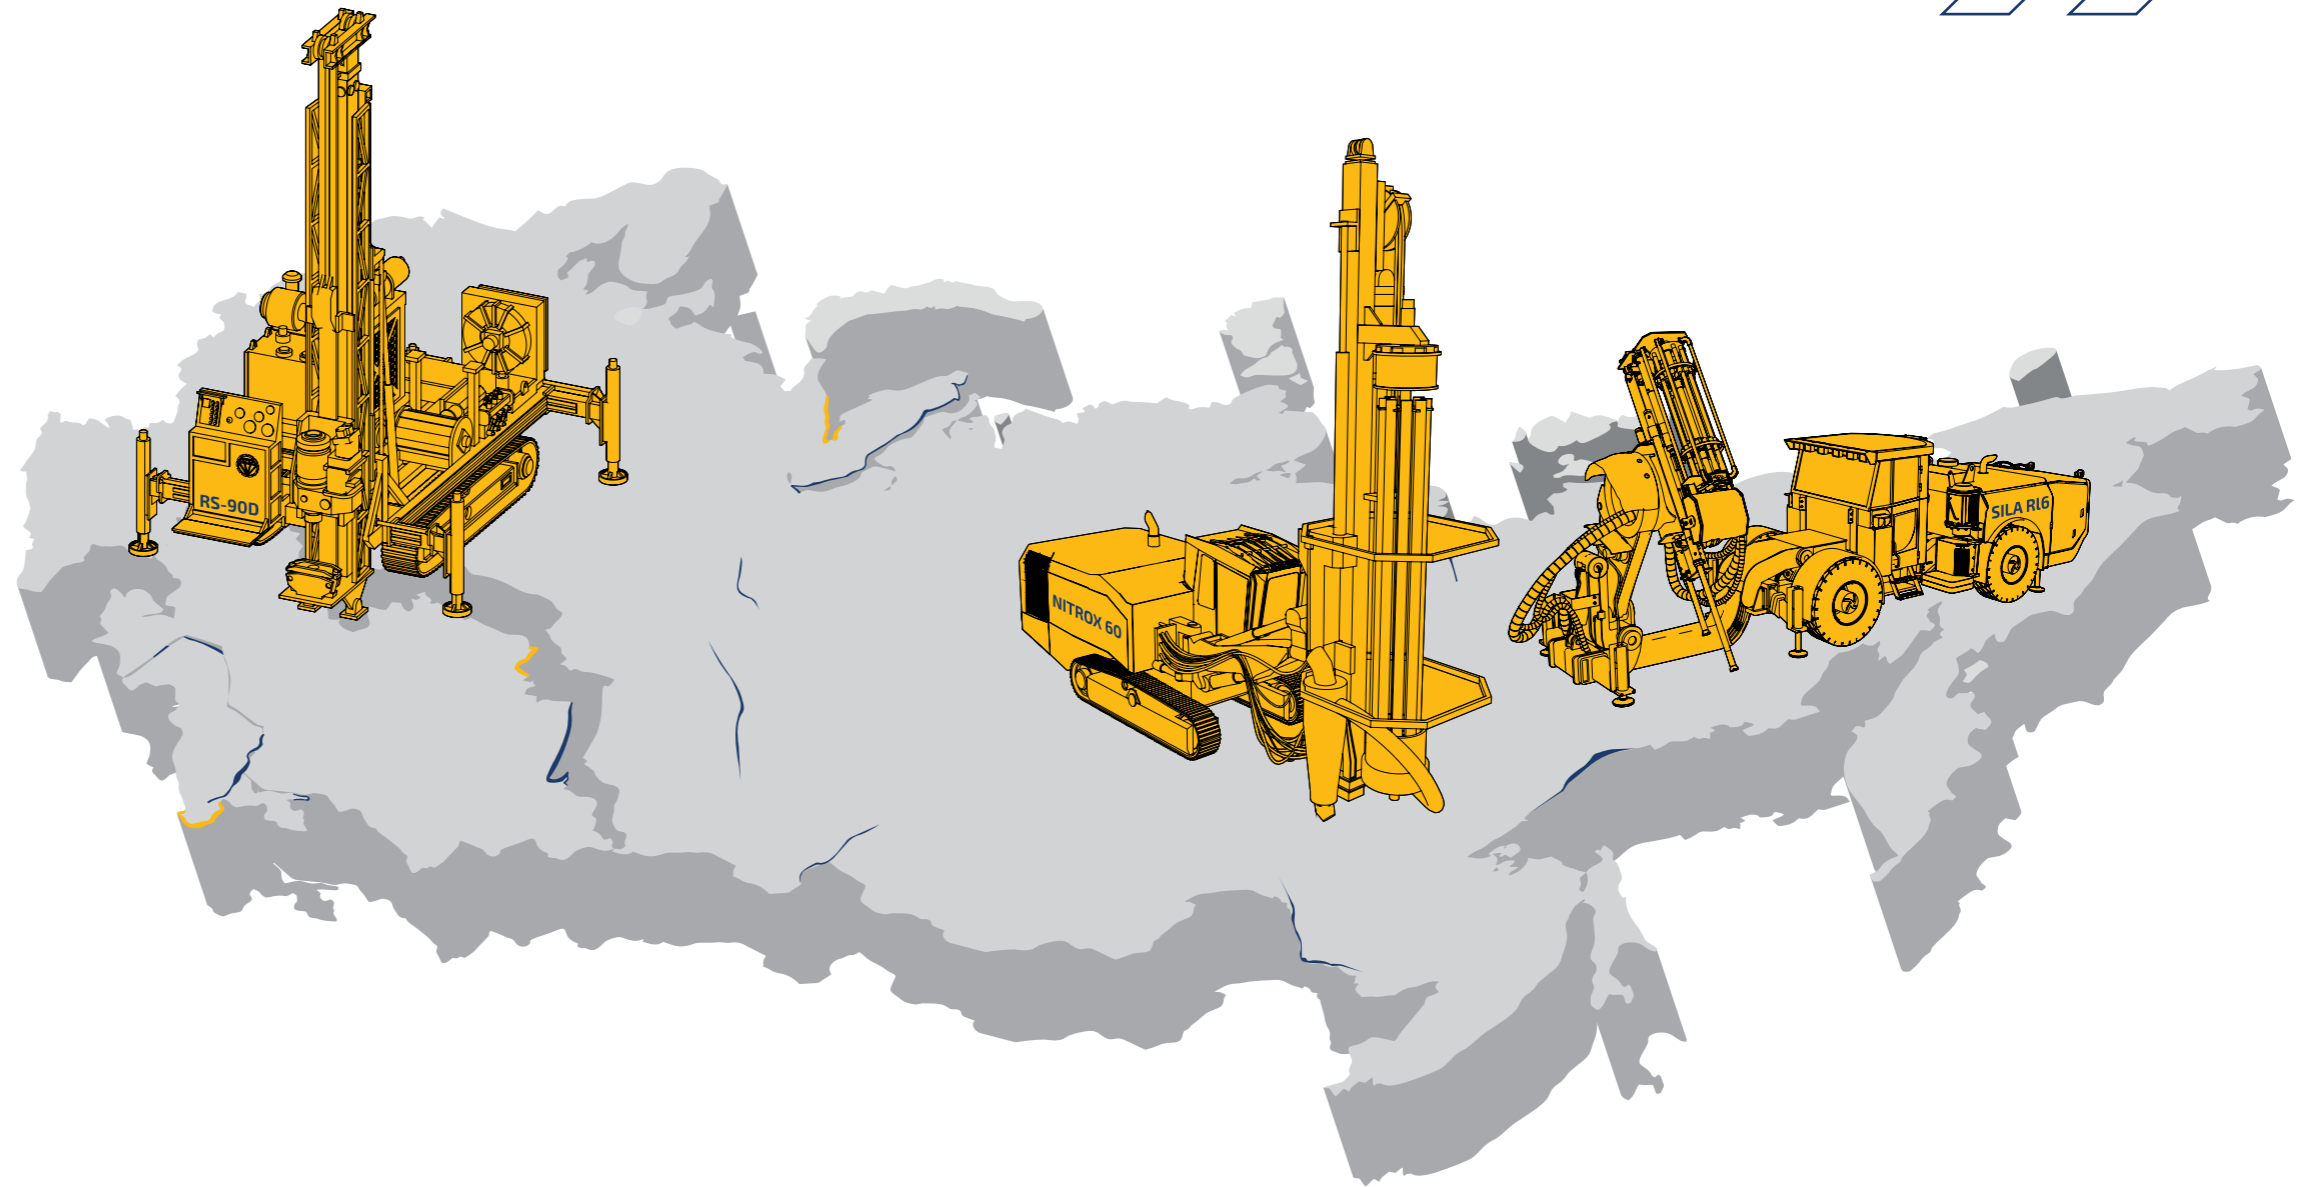

Units of drilling rigs
manufactured since 2019

85%

Guaranteed availability ratio when selecting
Almazgeobur drilling rigs

10 000+

Names of spare parts in stock:
Boart Longyear, Epiroc, Sandvik, Normet and others.

»» Import substitution

Due to the growing demand for the equipment and market exit of major foreign manufacturers such as **Boart Longyear, Epiroc, Sandvik**, our team decided to increase production capacity in the above-mentioned areas within the **framework of import substitution**.

In **2024** the Company mastered and launched serial production of self-propelled drilling rigs for underground operations: **SILA RL6** – self-propelled drilling rig for drilling radial and parallel deep boreholes in medium and large scale operations (advanced version of Simba drilling rig) and **STRELA RR2** tunnel drilling rig, equipped with two square booms, is designed for drilling 43 - 76 mm diameter boreholes in horizontal and vertical planes of tunnel excavations with a cross-section of 16 m² to 45 m² and for consolidation of these excavations (advanced version of the Boomer-M2D drilling rig).

In **2025** Almazgeobur will introduce RB and RBL self-propelled drilling rigs (advanced versions of DM and DML drilling rigs) to customers)

Currently we are ready to meet the demand for **in-house spare parts** for the following models: FlexiROC D60/D65, DM/DML, Boomer, Simba, as well as Sandvik series: DU; DD, etc.

» Manufacturing facilities

MOSCOW

Main manufacturing facility. Production of spare parts, drilling rigs, design bureau.

APATITY

Overhaul of mining equipment.
Assembly of hydraulic rock drills

VORONEZH

An assembly line of deck drilling rigs for multi-hole drilling of blast wells.

NOVOSIBIRSK

Production of drilling modules.

KHABAROVSK

Assembly line of Almazgeobur's flagship model RS-90.

GEOLOGICAL EXPLORATION RIGS

RS-230

RS-90

RS-90D

RU-75

RD-9
